

## Package Insert: CALCIMAX RTU

FOR ANIMAL USE ONLY

### **CALCIMAX RTU**

V32091 Act 36/1947

### **SHAKE WELL**

### **STORAGE**

Keep in a cool, dry place but do not refrigerate.

### **COMPOSITION Per 1 L RTU Solution**

Calcium	80 g
Magnesium	7 g
Propylene Glycol & Monosaccharides	250 g
Vitamin D3	20 000 IU

### **INDICATIONS**

CALCIMAX RTU is a RTU combination of calcium, magnesium and Vitamin D on an energy-based combo from Propylene Glycol and monosaccharides to assist in calcium, magnesium and energy deficits after calving, lambing, farrowing and foaling. Calcium sources are a unique blend from fast, medium and slow-release sources.

### **WARNINGS**

Keep out of reach of children or uninformed persons.

### **DIRECTIONS FOR USE**

USE ONLY AS DIRECTED

Use CALCIMAX RTU, 1- 4 hours post calving, lambing, farrowing or foaling.

Repeat after 12 hours and again 12 hours later if still required.

In real extreme dehydration conditions, add water to the CALCIMAX solution 10-fold the CALCIMAX volume. So 500 ml dosage could be supplemented with 5 L of water for extremely dehydrated animals.

### **Recommended Oral application: 1 ml / kg mass**

Dairy and Beef cattle (400 – 600 kg): 400 - 600 ml

Ewes: (50 – 65 kg): 50 – 65 ml

Mares: (400 – 600 kg): 400 – 600 ml

Sows: (90 – 120 kg): 90 – 120 ml

### **WARNING with ORAL application**

Administer slowly to avoid overflow into the windpipe and lungs.

### **MIXING INTO THE FEED**

The recommended allowance can also be mixed into the feed or dissolved in drinking water as a “once off” application where the CALCIMAX RTU feed or water is the only supply until finished. Repeat application after 12 hours. Note this means will yield slower support.

### **PRESENTATION**

500 ml, 1 L, 5 L, 25 L

### **REGISTRATION HOLDER**

Camelus Grondstowwe CC,  
Reg no: 1996/41164/23,
